Stamp pen laser rubber is suitable for stamp pen, great if very small and detailed effect are desired.

Its ideal- 1.5mm thickness enables a great fit for any type of pen covers, thus providing a simple and friendly usage of the product

Multi Resistant Laser Rubber designed especially to be used with oil based inks, yet additionally, the advantage is that it can also be used with alcohol based inks. Both kinds of inks are good and safe with this kind of rubber.

Rubber Pad is the helpful item whenever the stamping of documents is a kind of permanent action.

Can be used to cushion the move and hit while stamping.

Uncomplicated production process
